EDUCATION

Bachelor of Computer Applications (BCA) *2024 – 2027 (Expected)*
Indira Gandhi National Open University (IGNOU), Delhi
Relevant coursework: Data Structures, DBMS, Computer Networks, AI & ML

12th Grade — Science *90.2%*
GMIC, Etawah (UP), UPMSP

TECHNICAL SKILLS

Programming: Python, SQL, Bash
Computer Science: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Operating System basics
Databases: MySQL, PostgreSQL, SQLite
Systems & Networking: Linux (command line), TCP/IP, DNS, HTTP/HTTPS, Computer Networks
Tools: Git, GitHub, Docker (basics), AWS (basics), VS Code, Jupyter
Soft Skills: Problem solving, debugging, clear communication, teamwork, time management

EXPERIENCE

Data Analyst Intern — Bluestock Fintech *June 2026 – August 2026*
Remote (Part-time)

- Built a Python and SQL pipeline that cleans and loads 100,000+ mutual fund records (AMFI) into one dataset, so reports run automatically instead of by hand
- Cleaned messy Nifty100 market data so it could be used for trend analysis and dashboards

PROJECTS

SentinelOps — Self-Healing Service Monitor *2026*
Python, Flask, Docker, Bash, SQLite, GitHub Actions

- Wrote a Python script that checks a Docker web app every few seconds and restarts it automatically when it crashes or stops responding
- Saved every failure (time, cause, recovery time) in SQLite and used SQL to report uptime, number of failures, and average recovery time
- Added a one-command Bash setup script and a GitHub Actions workflow that runs tests on every push

WeakSpot — DSA Weakness Tracker *2026*
Python, SQL, SQLite, Codeforces API

- Built a Python tool that pulls my Codeforces submissions through the public API and saves them in a SQLite database
- Used SQL to find my weakest topics from success rate and retries, and suggest which problems to solve next
- Added a dashboard that shows my progress by topic over time

ACHIEVEMENTS

- Reached the semifinals of CodeFusion 2K26, a national hackathon with about 250 teams. Cleared two elimination rounds and built a working prototype with my team under a tight deadline

CERTIFICATIONS

- Data Analytics Essentials — Cisco Networking Academy, 2026
- Data Visualization & Software Development Job Simulations — Tata Consultancy Services (Forage), 2026
